HEALTHCARE MANAGEMENT PTE LTD

DA-7

Multifunction Electric ICU Bed

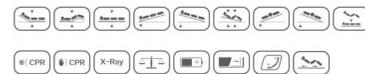

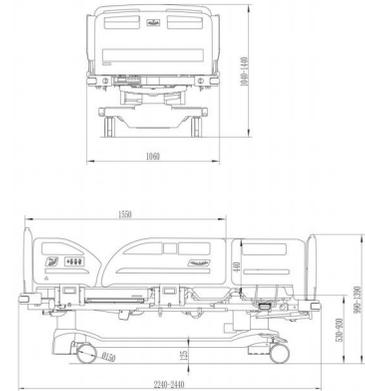

Technical features :	
Outer dimensions (Side rails up)	L2240*W1060mm (± 10mm)
Mattress platform	L1965*W920mm (± 10mm)
Bed height	H530-930mm (± 10mm)
Bed extension	200mm (± 10mm)
Maximum backrest	≥ 70°
Maximum thigh rest	≥ 30°
TR/ATR	≥ 12°
left and right tilt	≥ 15°
Height of side rails (above mattress platform)	440mm (± 10mm)
Safe working load	200kgs

Electric parameters :	
Power supply	220V/110V, 50HZ / 60HZ
Maximum input	1.6A, 450VA
Protection against water and dust	IPX4
Equipment security classification	Class II
Level of protection against injury from electrical current	Applied part type BF
Electric motor operation mode (load factor)	10%, max. 2 min/18 min

Standard configuration

- Split Side Rails:** The 4pcs PP side rails provide the patient with protection against falls and the 2 pcs additional side rails near foot board offer more safety service and also provide the support during patient's stand.
- Integrated Scales system:** The in-bed scales control panel located under the foot end is protected against impacts.
- Removable Mattress Platform:** The Mattress platform is plastic boards which can be easy removable and easy for sterilization. The mattress platform can do X-ray for back board and offer the patient's more comfortable.
- Central Nurse Control System:** The nurse or supervisor can adjust all the positions and find the comfortable and proper positions for the patients.
- Columns Motor System:** Electric lifting units in two columns enable the mattress platform height adjustment and TR&ATR positions, which can also ensure the bed's stability.
- Controls In The Side Rails:** Controls in the side rails increase the patient's independence so that the patients can operate it according to the self-requirement.
- Bed Extension:** The integrated bed extension adjusts the mattress platform length to the individual patient's height.
- Linens Shelf:** The linens shelf at the bottom of foot end also stores the supervisor panel.
- H/F Boards Locks:** The bed board locks prevent accidental removal of the bed boards when steering or handling the bed.
- X-Ray Cassette Holder:** The holder's special sliding construction allows the cassette to be comfortably inserted beneath the mattress platform from the side of the bed.
- Manual/Electric CPR:** The electric CPR is easy and convenience to operate that is one key control. And the manual CPR is equipped with damping device, which can let the back rest fall down slowly to ensure the safety of the patient when the power is off, the whole process can be single hand operation.
- Standing armrest:** (optional)
- Night light:** (optional)

Birth Bed

B-48

The LDR room is a single room for labor, delivery, recovery, and postpartum (LDRP). The equipment of this bed is suitable for all birth and delivery processes except cesarean section and general anesthesia delivery. All single delivery rooms are designed for the entire delivery process from birth to postpartum and neonatal care, and can handle most complications. LDR bed, as the key equipment in a single room can be fully adjusted to accommodate pre-delivery and various delivery positions, including lithotomy, sitting, squatting, lateral, Semi-prone and Trendelenberg. Complications and operations can be performed immediately without transferring patients. If transfer is needed, this wheeled LDR bed can be lifted to a stretcher height.

Standard configuration

- 1.Side Rails:** PP side rails, Built-in steel frame provides more secure and reliable protection, prevent patients from falling.
- 2.Built-in side rail controls:** Controls on the side rails increase the independence of patients can operate it according to self-requirement.
- 3.Mattress Platform:** The back section and seat plate are made of engineering plastics, which is more firm and easy to disinfect.
- 4.V-shaped incision mattress:** There is a v-shaped opening for dirt collection and delivery.
- 5.Labor grips:** Steel material which is shapped once, it is more firm and covered with soft foam which makes the grip feels comfortable; when not in use, it can be rotated and hidden under the bed surface to save space.
- 6.Foot pedal:** engineering plastic cover, built-in steel frame and equipped with mechanical moving system, can adjust position at any time, flexible and reliable.
- 7.Leg supports :** The leg supports are permanently connected to the bed to avoid misplaced components. The leg supports can be rotated and hidden under the bed to save space when they are not in use.
- 8.Removable foot section:** high-strength alloy aluminum, it is lighter and easier to install and disassemble, height can be adjusted.
- 9.Instant CPR:** Manual CPR allows the backrest to be restored to ensure patient safety and it is equipped with a damper to prevent an instant drop and one-handed operation.
- 10.Trendelenburg :** The bed can be tilted back to the head side with one button operation.

- 11.Central locking and steering system:** Centralized control of caster orientation, universal and brake functions.
- 12.Battery:** The bed can keep working without being connected to the power supply, facilitating position adjustment and control during emergency transportation.
- 13.IV pole in the both side of head position**
- 14.Infusion stand**
- 15.Stain basin**
- 16.Emergency stop button**
- 17.Night light**
- 18.Detachable headboards**
- 19.Bumper**

Specification parameters	
Overall size:	L2320×W990×H485mm (± 10mm)
Mattress platform	L2000×W860mm (± 10mm)
Lowest position (without mattress)	485mm (± 10mm)
Highest position (without mattress)	860mm (± 10mm)
Maximum back section angle	≥63°
Maximum seat section angle	≥15°
Maximum loading capacity:	227kg

(B-48-1)

B-43 Gynecology examination bed
SIZE: L1680 × W620 × H820mm

E-8-A3 Transport Stretcher is an economical and effective solution for various medical environments such as first aid, postoperative transfer, and temporary disposal.

Standard configuration

1. Central brake system: Equipped with four brake pedals on all sides of the bed make the brakes at the optimal position effectively and conveniently. Using the imported castors with high-quality bearings make the brakes more flexible and life span longer.

2. Multi-function instrument support: The instrument support can put the monitor and can also be used as a headboard to prevent accidental slippage of the patient.

3. Push Handle: Reducing the workload and preventing the injuries.

4. High quality mattress: The European standard water-proof cloth with the smooth surface of the mattress, easy to clean and not misplaced.

5. Large diameter wheel: Using the imported 8-inch silent caster make it flexible and durable.

6. The fifth wheel: The fifth wheel can provide a smaller radius of gyration. The telescopic collapse design can slide smoothly even on the rough surface or obstacles such as the elevator sill, reducing effectively the damage caused by transport to patients.

7. PP side rails: The three-stopped function side rail provides more convenient operation for transferring the patient and avoids postoperative instrument damage and occupational injury of the nurse.

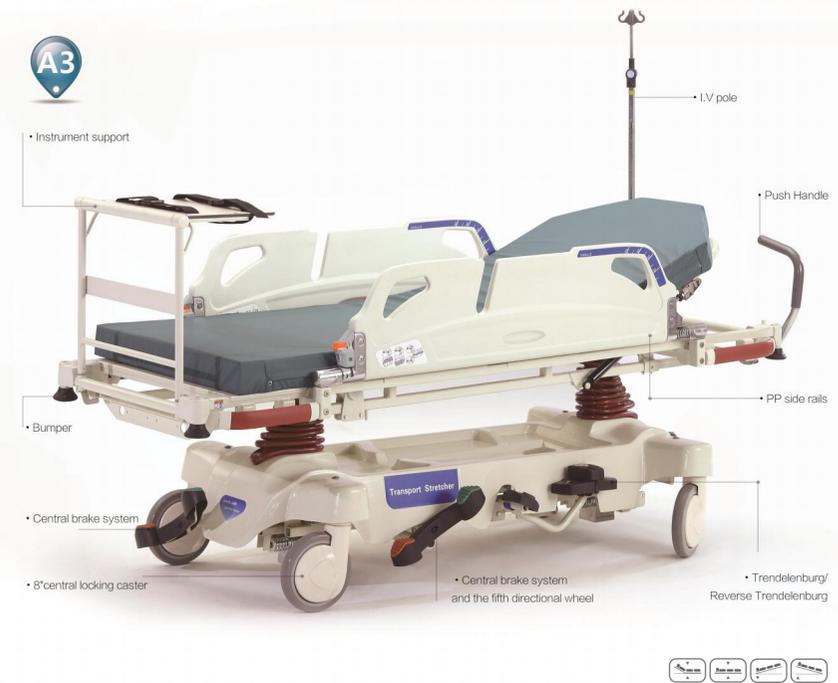

8. High-strength carbon steel structure and spray procedure: The high quality carbon steel and robot welding guarantee the mechanical strength. The spray surface treatment is easy to clean and guarantees a longer life.

9. Rapid lifting hydraulics: The imported dual-pressure lifting system can be used to quickly lift the bed or the push handle for 2 seconds in an emergency, and the bed will automatically locate the height to form a special body position for quick and timely disposal of the patient.

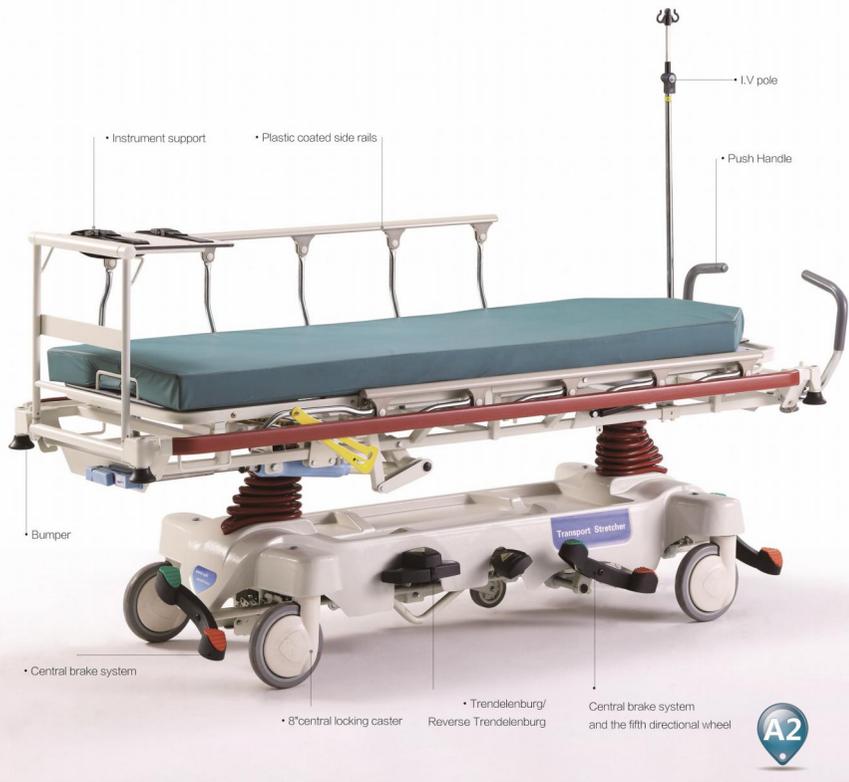

Technical parameters

Overall length:	2110mm
Overall width(side rails up):	750mm
Lowest position-floor to platform:	520mm
Highest position-floor to platform:	845mm
Side rail height above mattress platform:	300mm
Maximum backrest:	≥80°
Maximum Trend/Revers:	≥16°
Mattress size:	1880mm x660mm x80mm
Maximum weight capacity:	200kg

E-8 Transport Stretcher

E-8 Transport stretcher

Standard configuration

1. Central brake system: Equipped with four brake pedals on all sides of the bed make the brakes at the optimal position effectively and convenient. Using the imported castors with high-quality bearings make the brakes more flexible and life span longer.

5. Large diameter wheel: Using the imported 8-inch silent caster make it flexible and durable.

6. The fifth wheel: The fifth wheel can provide a smaller radius of gyration. The telescopic collapse design can slide smoothly even on the rough surface or obstacles such as the elevator sill, reducing effectively the damage caused by transport to patients.

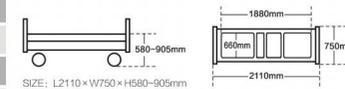

7. Plastic coated side rails: The side rails with stainless steel column guardrail covers almost entire length of bed.

8. High-strength carbon steel structure and spray procedure: The high quality carbon steel and robot welding guarantee the mechanical strength. The spray surface treatment is easy to clean and guarantees a longer life.

9. Rapid lifting hydraulics: The imported dual-pressure lifting system can be used to quickly lift the bed or the push handle for 2 seconds in an emergency, and the bed will automatically locate the height to form a special body position for quick and timely disposal of the patient.

10. X-ray Imaging: Equipped with X-ray material bed surface and X ray cassette holder, the whole body can be x-rayed.

Technical parameters	
Overall length:	2110mm
Overall width(side rails up):	750mm
Lowest position-floor to platform:	580mm
Highest position-floor to platform:	905mm
Side rail height above mattress platform:	360mm
Maximum backrest:	≥80°
Maximum thigh rest:	≥30°
Maximum TR/ATR:	≥16°
Mattress size:	1880mm x 660mm x 80mm
Maximum weight capacity:	200kg

E-8 Transport stretcher

SIZE: L2045 × W790 × H605-920mm

A1

- The main platform of the stretcher which is equipped imported double rise-and-fall hydraulic pump systems with is made of X-ray revealed material.
- Central locking system and the steering castor make the stretcher move steadily, reliably and lightly.
- The stretcher has the functions of hi-low, Trendelenburg and reverse Trendelenburg which are controlled by the pedals at the two sides of the stretcher.

- The rear of the stretcher has the central locking pedals, the bottom cover is made of ABS material and shaped once for all which can be easily cleaned.
- The stretcher is equipped with infusion poles, drainage hooks and collapsible aluminum alloy side rails.
- It is the best choice for emergency room and ICU ward for transferring patient.

E-3 Transport stretcher

SIZE: L1960 × W660 × H580-870mm

- Both of the platform and side rails are made of HDPE material shaped once for all.
- Backrest is controlled by hydraulic auxiliary spring.
- Height adjustment is operated by crank.
- Φ150mm castors with central locking system.
- To be equipped with steering castor.

DE-1

Electric mobile patient lift

Applications:

This product is applicable for long-term bedridden patients, and the patients who suffer from mobility problem or immobility after surgery. It can be used with the help of caregivers in hospitals, nursing centers or at home. The caregivers can lift or move the patient with a single operation, and the labor-saving design can avoid back injury of patient caused by improper force of the caregiver.

Features:

The main frame is made of high-strength steel tube with powder coating on surface. It is featured by front universal castors, rear brake castors, adjustable width of leg of foot stand, safe and reliable suspension pocket and emergency release lowering device, and the patients can be put down in case of depleted battery or motor fault.
